

Reports Overview

Last Modified on 07/03/2020 1:16 pm EDT

A report displays object or assessment data via one or more of the following report elements:

- Tables;
- Pie charts;
- Half-pie charts;
- Heat maps;
- Bar charts;
- Column charts;
- Repeatable forms (printer-friendly, non-editable configurable forms);
- Free form text (additional text displayed on the report with optional formatting); and
- Page breaks (to break a page when printing or exporting a report).

Each new report requires a data definition is selected as the report focus and each element (tables, charts, heat maps, or repeatable forms) added to the report canvas requires a data series to further filter the available object data. For more information on focuses and data series, see the [Data Visualization Focuses & Data Series](#).

Only administrators can create reports, but end-users can view and [star](#) reports, apply filters, view [historical data](#), and [export](#) report data from a view or [form action](#).

For information on creating a report and adding form elements, [Create a New Report](#) and [Report Elements](#).
