

# The Portal in Security Risk Management

Last Modified on 04/04/2022 12:47 pm EDT

People in the [Security Audit Fieldwork](#), [Issue Owner & Delegate](#), and [Corrective Action Owner & Delegate](#) user groups have access to the **Portal** application. [Administrators](#) do not have access to the **Portal**, unless they belong to another group that's been provided access.

The **Portal** provides access to the activities relevant to your user group. Any tasks assigned to you will appear on the [My Tasks](#) page, but they can also be accessed through the **Portal**. The **Portal** contains three activities:

- [Security Audits](#): Visible to members of the **Security Audit Fieldwork** user groups.
- [Issues](#): Visible to members of the **Issue Owner & Delegate**, **SRM Assigned Actions** and **Security Audit Framework** user groups.
- [Corrective Actions](#): Visible to members of the **Corrective Action Owner & Delegate**, **SRM Assigned Actions** and **Security Audit Fieldwork** user groups.

If your organization uses other Resolver apps, you may see additional activities in the **Portal**.

The screenshot displays the Resolver Portal interface. At the top, the Resolver logo is on the left, a search bar in the center, and user profile icons on the right. Below the header, a navigation bar shows 'Portal' with a dropdown arrow, and three tabs: 'Security Audits' (active), 'Issues', and 'Corrective Actions'. The main content area is titled 'Security Audits' and is divided into two sections. The first section, 'Enterprise Assessments', contains one item: 'LA-6 Headquarters Annual Hazard Inspection - 2021' with a 'CORPORATE' tag and a 'Fieldwork' button. The second section, 'Issues', contains three items: 'I-2 No oversight and review' (description: 'There is no supervision or review of the process') with an 'Overdue' tag; 'I-7 Deficiency in the operation of a key IT general control' (description: 'A key application or IT general control is not operating effectively') with an 'Overdue' tag; and 'I-9 No formal change management process' (description: 'Controls may exist for this objective, but have undergone changes without adequate review and approval and may not provide adequate coverage') with a 'Draft' tag.

*The portal as displayed to a member of the Security Assessment Team.*
