

Attachments

Last Modified on 12/08/2025 1:58 pm EST

The **attachments** field allows users to upload files, URLs (web links), or both to an object. Most standard file types are accepted by this field; however, there are some restrictions (see below). If a supported document file is uploaded to this field, it's possible to search for those documents by keywords in the file name and/or contents or by upload date. See the [Attachment Searches](#) article for more details.

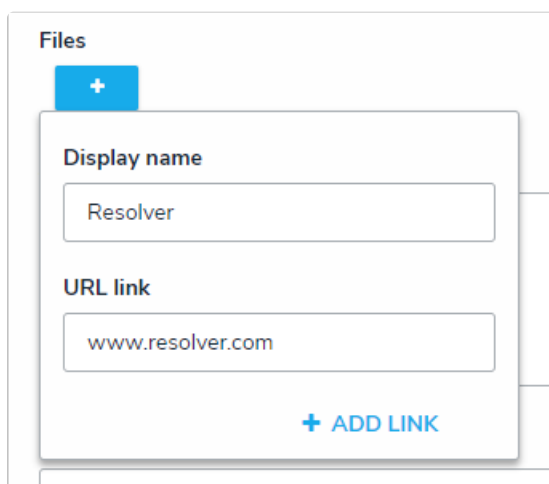

The screenshot shows a user interface for an attachment field. At the top, under the heading 'Files', there are two items: 'Field Notes.docx' with a document icon and 'Resolver' with a link icon. Below these items is a large dashed rectangular area. Inside this area, the text 'Drag files here or click to select...' is centered. Below this text, the word 'or' is centered. At the bottom of the dashed area, the text 'Click to add a web link to a file...' is centered.

An attachment field (file and web link).

When the **File only** or **File and web link** option is selected in the field's settings, users can upload files (up to 100 MB in size) or web links by clicking the file or web link upload area on a form (as shown in the screenshot above).

If the **Web link only** option is selected, users can upload a link by clicking the  icon (as shown in the screenshot below). If the optional display name for the web link is not included, the full URL will be displayed. Clicking the link will open the site in a new tab in your browser.

This field type cannot be embedded as a variable in an [email template](#).

The screenshot shows a user interface for an attachment field. At the top, under the heading 'Files', there is a blue square with a white plus icon. Below this icon is a modal dialog box. Inside the dialog, there are two input fields: 'Display name' with the value 'Resolver' and 'URL link' with the value 'www.resolver.com'. At the bottom of the dialog is a blue button with a white plus icon and the text '+ ADD LINK'.

An attachment field with the Web link only option selected.

File Restrictions

Note:

Files that contain the word **compressed** cannot be uploaded.

Instructions

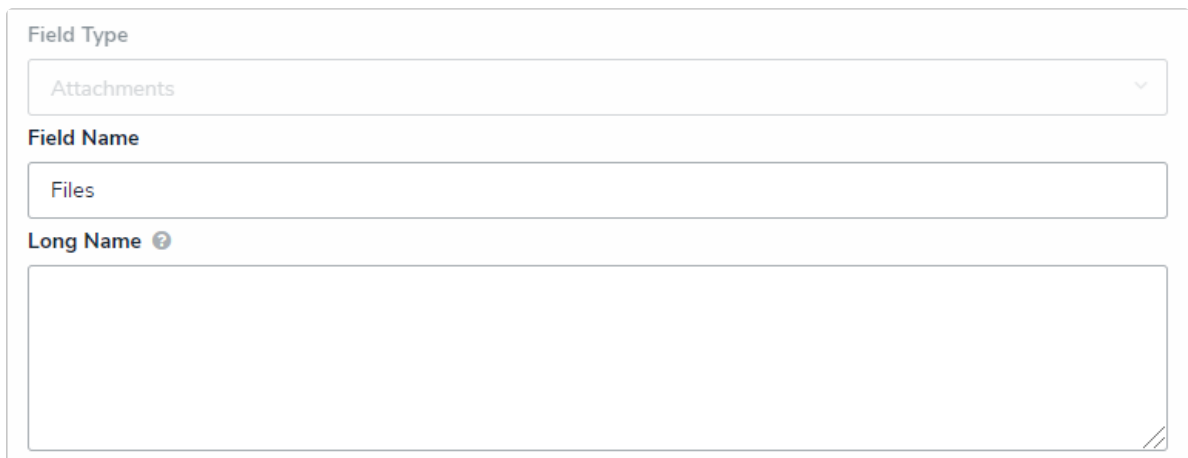

To create an attachment field:

1. Click the icon in the top bar > **Fields** in the **Data Model** section.
2. Click **Create Field**.
3. Hover your cursor over the **Attachment** field type, then click **Create Field**.

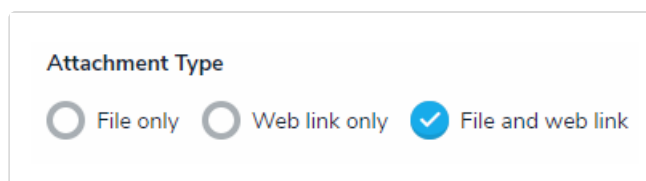

The Attachment field option after clicking Create Field.

4. Enter a name for the field as it will appear on an object type in **Field Name**.
5. **Optional:** If needed, provide additional information or instructions on completing the field in the **Long Name** section. You can choose to display a field's long name on configurable forms.

The Name and Long Name fields.

6. Select one of the following options from the **Attachment Type** section:
 - **File only:** Users can upload files (up to 100MB in size) to an object.
 - **Web link only:** Users can upload URLs to an object.
 - **File and web link:** Users can upload files (up to 100MB in size) and URLs to an object.

The Attachment Type section.

7. Use the **Preview** section to confirm the field is correct.

You can click or drag and drop files into the upload area to test the attachment field, however, you will not be able to successfully upload a file as this is a preview only.

8. Click **Create**.
