

Edit or Delete a Data Definition

Last Modified on 06/13/2024 11:35 am EDT

Overview

An active Data Definition can be deleted from Resolver if you remove the Data Definition from the Data Visualization or Assessment. You will receive a system-generated message indicating that the Data Definition is currently in use if you try to remove a Data Definition before removing it from the Data Visualization or Assessment.

Users can now add additional elements to a Data Definition if Reports or Orchestration Event Actions do not currently use it. Otherwise, Data Definitions can be edited by extending the path. System-generated messages will now indicate when additional elements can be added and when a Data Definition is used.

Note: Previously selected data points cannot be removed.

User Account Requirements

The user account you use to log into Resolver must have Administrator permission to use the Data Definition feature.

Navigation

1. From the **Home** screen, click the **Administration** icon.

Administration Icon

2. From the **Admin: Overview** screen, click the **Data Definition** tile under the **Data Model** section.

Data Definition Tile

- From the **Admin: Data Definition** screen, enter a keyword in the **Search** field to narrow the Data Definition list.

Search Field

- Click a **Data Definition** name.

Data Definition Name

Editing a Data Definition

Users can now add elements to a Data Definition if the system does not use it. A system-generated message will appear if the Data Definition cannot be deleted.

System-Generate Message

1. From the **Admin: Edit Data Definition** screen, scroll to the **Data Path** section.
2. Click an **Object Type Node** to expand and select a Relationship, Reference, or Object Type.

Object Type Node Expanded

3. When you have added all the required elements, click the **Update** button to save your changes.

Update Button

Deleting a Data Definition

An active Data Definition can be deleted from Resolver if you remove the Data Definition from the Data Visualization or Assessment.

1. From the **Admin: Edit Data Definition** screen, scroll to the bottom and click the **Delete** button.

Delete Button

2. A **Confirmation** pop-up will appear. Click the **Yes** button to delete the Data Definition.

Confirmation Pop-up
