

Priority Overview

Last Modified on 10/01/2019 3:00 pm EDT

Priorities are the level of importance assigned to a dispatch. You can create unique names for the priorities as they appear in Dispatch, adjust their order, create visual alerts, and control who can access the priorities based on their accessible operational zone.

The screenshot displays the 'Priority' configuration page. On the left, a dark blue sidebar contains a search bar and three priority levels: 'High' (highlighted in blue), 'Medium', and 'Low'. The main content area on the right is white and contains the following settings:

- Priority Name:** A text input field containing 'High'.
- Order:** A numeric input field containing '0' with up and down arrow buttons.
- Perspective Priority Link:** A dropdown menu showing '1 - High'.
- Accessible Operational Zones:** A dropdown menu showing 'All'.
- Priority Color:**
 - Theme:** A dropdown menu showing 'Default'.
 - Color:** A color picker showing a red color.
 - Formatting:** Four checkboxes for 'Bold', 'Italic', 'Underline', and 'Strikethrough', all of which are currently unchecked.
 - Preview:** A red rectangular preview box.

The Priority settings.
