

Loss Event Owners Overview

Last Modified on 02/25/2025 2:30 pm EST

Loss event owners are responsible for submitting loss events to be triaged, determining the events' losses and recoveries, analyzing the root cause of the event, linking events to corrective actions, and submitting the events to the **Risk Team** for review. If need be, loss event owners can link events to risks they have been granted access to. Loss event owners are assigned by the [Risk Team](#).

Assigned events appear on the [My Tasks](#) page.

Assigned Loss Events on the My Tasks page.
