

Translate Text Fields on a Form

Last Modified on 03/03/2023 3:57 pm EST

To translate text fields on a form, click the ellipsis symbol at the upper-right corner of a form, then click **Create [base language] Translation**. The fields selected by an admin in the form's settings will then automatically translate into your org's base language. For a list of supported and unsupported languages, see the [Supported Language Translations](#) article.

Observation Details

Observation

Je suis Kit Stevens, un opérateur de chariot élévateur chez ABC Shipping Lines. Le 1er décembre 2020, j'ai vu mon collègue Josh Lee tomber malade après avoir été exposé à des vapeurs de monoxyde de carbone. Il se plaignait de nausées et de vertiges et semblait presque s'évanouir à un moment donné. Josh Lee a été emmenée au compartiment médical par Donna Martin une fois qu'elle a réalisé ce qui s'était passé, et Donald Summers et moi-même avons reçu l'ordre d'éteindre notre équipement et de faire une pause d'une heure à l'extérieur du quai de chargement et à l'air frais. Je ne me suis senti mal à aucun moment.

Observation Details

Observation

I'm Kit Stevens, a forklift operator at ABC Shipping Lines. On December 1, 2020, I saw my colleague Josh Lee get sick after being exposed to carbon monoxide vapours. He complained of nausea and dizziness and almost seemed to faint at some point. Josh Lee was taken to the medical compartment by Donna Martin once she realized what had happened, and Donald Summers and I were ordered to turn off our equipment and take a one-hour break outside the loading dock and in the fresh air. I didn't feel bad at any time.

A translated field.

Important Notes

- If the translation option is not visible on a form, it either hasn't been enabled for your org or

an admin hasn't enabled it for that form. If a particular text field hasn't been translated, it means an admin hasn't enabled translation on that field.

- Translation of large text fields (over 5000 bytes) may result in stripped whitespace. For example, if a large text field included “Bonjour monde! Avoir un bonne journee”, it may result in “Hello world!Have a good day.”
- Because rich text fields have a 20,000 character limit, a large amount of text in this field may be translated over the character limit. If this happens, the text will be reduced to the maximum limit and a notification banner is displayed.
- Once a translation is complete, it's possible to view the original text by clicking the  icon by the translated field; however, translations cannot be undone and any additions or changes to the text field are not translated.
