

Review an Internal Audit's Controls

Last Modified on 09/15/2025 9:49 am EDT

Overview

When an Internal Audit Project moves from the **Planning** stage to the **Fieldwork** stage, members of the Internal Audit Leads/Managers and Internal Audit Staff user groups will receive an email notification from **noreply@resolver.com**, indicating that the Internal Audit Project is available for Controls review. If the email does not appear in your **Inbox**, please search another email folder (e.g. Junk, etc.).

Planning Stage System Email Notification

Click the **Click the link below to access** link to access the Audit Project. If you are not logged into Resolver, you will be redirected to the Resolver Login screen before the Audit Project.

Internal Audit Staff can review the controls attached to the project. Resolver recommends that a control is reviewed after all attached tests have been reviewed.

All internal audit projects that require action will also appear on the user's [My Tasks](#) section on the **Home** screen.

User Account Requirements

The user account used to log into Resolver must be added to the Internal Audit Staff user group.

Related Information/Setup

Please refer to the [Adding an Existing Test, Document Request, Policy, or Issue to a](#)

[Control](#) article for more information on adding an existing element to a control.

Please refer to the [Adding a New Policy to a Control](#) article for more information on adding a new policy to a control.

Please refer to the [Adding a New Document Request to a Control](#) article for more information on adding a new document request to a control.

Navigation

All Internal Audit Projects that require action will also appear on the user's [My Tasks](#) section on the **Home** screen. However, Resolver recommends you access Controls through Internal Audit Management for ease of navigation.

Alternate Navigation

1. From the **Home** screen, click the **Home** dropdown and select the **Internal Audit Management** link.

Home Dropdown

2. From the **Risk Assessment** screen, click on the **Fieldwork** tab.

Fieldwork Tab

- From the **Fieldwork** screen, click on the **Internal Audit** report name that contains the **Control Test** you want to perform from the **Audits in Progress** section.

Internal Audit Report

- From the **Audit Project Overview** screen, click on the **Expand** icon on the **Navigation Tree** to expand the nodes until you find the desired control.
- Click the control to open the **Control Details** tab. Controls are indicated with a **C** icon next to the control name on the node.

Control Node

- Click the **Collapse** Icon to collapse the **Navigation Tree**.

Collapse Icon

Review an Internal Audits Controls

- (Optional) Edit the control **Description** outlining further details or instructions.

Description Field

- Enter a username or user group name in the **Control Owner** field and select a user or user group from the **Control Owner** dropdown menu. The **Control Owner** field indicates the user or user group responsible for the Control. Multiple owners can be assigned to a single control if desired.

The screenshot shows the 'Internal Audit Management' interface. On the left, under 'Control Details', the 'Control Owner' field is highlighted with a red box. It contains a search bar with 'Internal' entered and a dropdown menu showing 'Internal Controls First Line Users (Limited User)'. To the right, the 'Testing Summary' tab is active, displaying a table of test results. The table has columns: Unique ID, Name, # of Samples Tested, # of Samples Failed, Working Papers, and Test Result. One test is listed: T-4.1, Review of critical IS information, 10 samples tested, 5 samples failed, and a 'Fail' result. Below the table, there are fields for 'Total Samples Planned' (15) and 'Sampling Justification'.

Control Owner Dropdown Menu

- Select the team that will be responsible for performing tests on the control from the **Tested By** dropdown menu.

This screenshot shows the same 'Internal Audit Management' interface. The 'Tested By' dropdown menu is highlighted with a red box. It is open, showing a list of teams: Risk Team, Internal Controls Team, Internal Audit Team, Management Self Assessment, Compliance Team, Risk Team, External Audit, and Other. The 'Control Owner' field is now filled with 'Internal Controls First Line Users (Limited User)'. The 'Testing Summary' table and other fields remain the same as in the previous screenshot.

Tested By Dropdown Menu

- From the **Control Attributes** section view/edit the following attributes:
 - Key Control:** Select a **Key Control** type from the dropdown menu:
 - Key:** A **Key Control** refers to a high-risk Control which can cause a process to fail.
 - Not Key:** **Not Key** (Non-Key) Control refers to a low-risk Control which does not have the potential to cause a process to fail.
 - N/A:** Not Applicable

Frequency Dropdown Menu

- **Assertions:** Select an Assertion type from the dropdown menu.
 - **Rights and Obligations:** An account balance Assertion type that tests if the entity being audited has ownership rights or benefits from assets listed on the financial statement at the date of reporting (e.g., examination of the title deed).
 - **Existence or Occurrence:** The balances of assets, liabilities, and equity exist at the date of reporting and states that all transactions are business related.
 - **Completeness:** An account balance Assertion type that concerns the completeness of transactions at the date of reporting.
 - **Valuation or Allocation:** An account balance Assertion type that tests if the financial statements are correctly valued based on the application accounting standards or accounting policies that are used by the entity.
 - **Presentation and Disclosure:** An Assertion type that presentation and disclosure of financial statement information at the reporting date.

The screenshot shows the 'Internal Audit Management' interface. On the left, under 'Control Attributes', the 'Assertions' dropdown menu is open, displaying options: 'Existence or Occurrence' (selected), 'Completeness', 'Valuation or Allocation', 'Rights and Obligations', 'Presentation and Disclosure', and 'Manual'. The main panel on the right shows a dashboard with two gauges: '% of Samples Tested' at 67% (In Progress) and '% of Samples Failed' at 50% (Failed). Below the gauges is a 'Testing Summary' section with a text editor.

Assertions Dropdown Menu

- **Prevent or Detect:** Select an **Audit** type from the dropdown menu:
 - **Prevent:** A **Preventive** Audit type attempts to identify the risks before they occur.
 - **Detect:** A **Detective** Audit type identifies the risks after they occur.

The screenshot shows the 'Internal Audit Management' interface. On the left, under 'Control Attributes', the 'Prevent or Detect' dropdown menu is open, displaying options: 'Detective' (selected), 'Preventive', and 'Detective'. The main panel on the right shows the same dashboard as the previous screenshot, with gauges for '% of Samples Tested' (67%) and '% of Samples Failed' (50%), and a 'Testing Summary' section.

Prevent or Detect Dropdown Menu

- **Automated Control:** Select an **Automated Control** from the dropdown menu:
 - **Manual:** A Control that is performed by an individual (e.g., Supervisor) without using an automated system (e.g., Supervisor Review).
 - **System Dependent:** A Control that is performed by an individual with the aid of an automated system (e.g., a system-generated report that requires human intervention for review).
 - **Automated:** A Control performed by a system or software designed to prevent or detect risks (e.g., two-factor authentication).

The screenshot shows the 'Internal Audit Management' interface. On the left, the 'Control Attributes' section contains several dropdown menus: 'Key Control' (set to 'Key'), 'Frequency' (set to 'Bi-Weekly'), 'Assertions' (set to 'Existence or Occurrence'), 'Prevent or Detect' (set to 'Detective'), and 'Automated Control'. The 'Automated Control' dropdown is highlighted with a red box, and its menu is open, showing four options: 'Manual', 'Manual', 'System Dependent', and 'Automated'. The right side of the interface displays a dashboard with two gauges: '% of Samples Tested' at 67% (In Progress) and '% of Samples Failed' at 50% (Failed). Below the gauges is a 'Testing Summary' section with a text editor and a character count of 20000.

Automated Controls Dropdown Menu

- **Information System:** Enter an Information System Name (e.g., ERP, HRIS, etc.) in the **Information System** field and select an Information System from the dropdown menu mapping the Information System to the Control.

This screenshot is similar to the previous one, showing the 'Internal Audit Management' interface. The 'Control Attributes' section is visible on the left. The 'Information System' dropdown menu is highlighted with a red box, and its menu is open, showing two options: 'Microsoft Dynamics Library' and 'Oracle Library'. The right side of the interface shows the same dashboard with gauges and a 'Testing Summary' section.

Information System Dropdown Menu

Testing Summary Tab

1. The **Testing Summary** tab allows users to view a test summary, add existing test, or create a new test to add to the control.
 - **Test Unique ID:** The test's unique ID which is used to identify the test throughout the system.
 - **Name:** The tests name.
 - **# of Samples Tested:** This field displays the number of Control samples tested.
 - **# of Samples Failed:** This field displays the number of Control samples that failed.
 - **Working Papers:** The **Working Papers** field displays connected supporting document files. Click the **Working Paper** link to download a copy of the attached working paper.

- **Test Results:** The Testing Results field displays the overall results of the audit test.
 - Not Tested
 - Not Effective
 - Partially Effective
 - Effective
- Click the **X** next to a test to remove it.
- **Add Existing Test:** Click the **Add Existing Test** link to add an existing test to the control.
- **+ Create New:** Click the **+ Create New** link to create a new test to add to the control.

The screenshot shows the 'Review NAICS concentration report' page. The 'Testing Summary' table has the following data:

Unique ID	Name	# of Samples Tested	# of Samples Failed	Working Papers	Test Result
T-4.1	Review of critical IS information	10	5	Internal Audit Management Article Tracker.xlsx	Fail

Below the table, there are two links: 'ADD EXISTING TEST' and '+ CREATE NEW'.

Test Summary Test Links

2. Enter the number of samples you plan to test with this control in the **Total Samples Planned** field.

The screenshot shows the 'Control Details' page. The 'Total Samples Planned' field is highlighted with a red box and contains the value 15. Below this, there are two donut charts:

- % of Samples Tested:** 67% (In Progress)
- % of Samples Failed:** 50% (Failed)

Below the charts, there is a 'Testing Summary' text area with a character count of 20000.

Total Samples Planned

3. Explain why you picked that number of samples in the **Sampling Justification** field.

The screenshot shows the 'Internal Audit Management' interface. On the left, there's a sidebar with 'Control Owner' (Internal Controls First Line Users (Limited User)), 'Tested By' (Internal Controls Team), and 'Control Attributes' (Key Control: Key, Frequency: Bi-Weekly, Assertions: Existence or Occurrence, Prevent or Detect: Detective, Automated Control: Manual, Information System: Microsoft Dynamics). The main area has a 'Sampling Justification' field highlighted with a red box. Below it are two gauge charts: '% of Samples Tested' showing 67% In Progress and '% of Samples Failed' showing 50% Failed. A 'Testing Summary' field is also visible.

Sampling Justification Field

- The Test Charts, **% of Samples Tested** and **% of Samples Failed**, display a summary of samples tested and percentage of samples failed for this particular control.

This screenshot is similar to the previous one, but the 'Test Charts' (the two gauge charts for '% of Samples Tested' and '% of Samples Failed') are highlighted with a red box. The '% of Samples Tested' gauge shows 67% In Progress, and the '% of Samples Failed' gauge shows 50% Failed. The 'Sampling Justification' field is now empty.

Test Charts

- Enter a test results summary in the **Testing Summary** field.

This screenshot shows the 'Testing Summary' field highlighted with a red box. Below the field, there are sections for 'Design Effectiveness' (Not Effective), 'Operating Effectiveness' (Effective), and 'Supporting Attachments' with 'ADD FILE' and 'ADD LINK' buttons. The 'Testing Summary' field is empty.

Testing Summary Field

6. Select a Design Effectiveness test result from the **Design Effectiveness** dropdown menu to indicate the effectiveness of the test's design.

Design Effectiveness Menu

7. Select an Operating Effectiveness test result from the **Operating Effectiveness** dropdown menu to indicate the effectiveness of the test's operation.

Operating Effectiveness Menu

8. Add supporting document files (up to 100 MB per file) to the Audit by dragging and dropping the files in the designated area or selecting a file from the connected PC, the following file types .bat, .exe, .gif, .sh, .dll, and .com cannot be uploaded. You can also add web links to supporting documents by clicking on the **Click to add a web link to a file** . Enter a **Display Name** and **URL Link** on the **Web Link** pop-up and click the **+ Add Link** button to add a web link.

Support Attachments Field

9. **(Optional)** Click the **More** icon on the uploaded file card to [upload new version](#), [rename](#), [delete](#), or check [version history](#).

More Icon

Document Requests Tab

1. From the **Testing Summary** tab, click the **Document Requests** tab.

Document Requests Tab

- From the **Document Requests** tab, users can view a document request summary, add existing document request, or create a new document request to add to the control.
 - **Document Unique ID:** The document request unique ID which is used to identify the document request throughout the system.
 - **Name:** The document request name.
 - **Due Date:** The date the document request is due.
 - **Documentation Attachments/URL:** The document request or document request URL. Click the **Documentation Attachments/URL** link to download a copy of the attached working paper.
 - **Workflow State:** The current workflow state of the document request.
 - **Add Existing Test:** Click the **Add Existing Document Request** link to add an existing document request to the control.
 - **+ Create New:** Click the **+ Create New** link to create a new document request to add to the control.

Document Request Tab

Related Data Tab

- From the **Testing Summary** tab, click the **Related Data** tab.

Related Data Tab

2. From the **Related Data** tab, users can view a related data summary including risk, policy, citation, and requirement data.

- **Risk Table:**

- **Risk Unique ID:** The risk's unique ID which represents the risk throughout the system.
- **Name:** The risk name. Click the **Risk Name** to open the **Risk** pop-up for further details.
- **Inherent Risk Score:** The Inherent Risk Score is a baseline indicating the severity of the Risk. The Inherent Risk Score is calculated using Likelihood x Impact = Inherent Risk Score.
- **Control Effectiveness:** The risk's control effectiveness score which is how effective the control is at preventing the risk.
- **Residual Risk Score:** The event's residual risk score which is the amount of risk left after a control is in place.

- **Policy Table:**

- **Policy Unique ID:** The policy's unique ID which represents the policy throughout the system.
- **Name:** The policy name. Click the **Policy Name** to open the **Policy** pop-up for further details.
- **Last Review Date:** The last time the policy was reviewed.
- **Workflow State:** The policy's current workflow state.
- **Add Existing Policy:** Click the **Add Existing Policy** link to add an existing policy to the control.
- **+ Create New:** Click the **+ Create New** link to create a new policy to add to the control.

- **Citation Table:**

- **Citation Unique ID:** The citation's unique ID which represents the citation throughout the system.
- **Name:** The citation name. Click the **Citation Name** to open the **Citation**

pop-up for further details.

- **Requirements Table:**

- **Requirements Unique ID:** The requirement's unique ID which represents the requirement throughout the system.
- **Name:** The requirement name. Click the **Requirement Name** to open the **Requirements** pop-up for further details.

Related Data Tab

Sampling Guidance Tab

1. From the **Testing Summary** tab, click the **Sampling Guidance** tab.

Sampling Guidance Tab

2. The **Sampling Guidance** tab provides users with the sample size required to provide reasonable assurance.

Sampling Guidance

Sampling Size Strategy

The following table provides the sample sizes required to provide reasonable assurance and where the population available to test covers the full year to the date of testing

Frequency	Annual Population	Sample range	High rating	Medium rating	Low rating
Annual	1	1	1	1	1
Quarterly	2-4	2	2	2	2
Monthly	5-12	2 - 5	5	4	2
Weekly	13-52	5 - 15	15	10	5
Daily	53 -250	20 -40	40	30	20
Multiple times a day	>250	25-60	60	45	25

Sampling Guidance Table

Audit Findings

- From the **Testing Summary** tab, scroll to the **Audit Finding** section.
- The **Audit Findings** table allows a user to record any issues that were discovered during testing.
 - Issues Unique ID:** The issue's unique ID which represents the issue throughout the system.
 - Name:** The risk name. Click the **Risk Name** to open the **Risk** pop-up for further details.
 - Date Identified:** The date the issue was identified.
 - Due Date:** The issue's due date.
 - Priority:** The issue's priority indicating the severity of the Issue (e.g., Low, Medium, High, or Urgent).
 - Workflow State:** The issue's current workflow state.
 - Add Existing Policy:** Click the **Add Existing Issues** link to add an existing issue to the control.
 - + Create New:** Click the **+ Create New** link to create a new issue to add to the control.

Audit Findings

Record details around any issues that arise during testing.

Issues Unique ID	Name	Date Identified	Due Date	Priority	Workflow State
I-9	No formal change management process	April 20, 2024	May 20, 2024	Low	Draft
