

Deleting a Data Transformation

Last Modified on 01/29/2025 4:49 pm EST

Overview

The **Data Transformation Type** field is locked down and cannot be modified when a Data Transformation is created. A user must delete the Data Transformation and create a new one to change the **Data Transformation Type** field.

User Account Requirements

The user account you use to log into Resolver must have Administrator permission or Data Management advanced permissions to delete a Data Transformation.

Related Information/Setup

Data Transformations generate new fields to use on a Dashboard by performing basic calculations between two or more fields, formulas, or properties in the Dashboard Data Set.

- [Adding a Data Transformation to a Dashboard Data Set](#)

Navigation

1. From the **Home** screen, click the **Administration** icon.

Administration Icon

2. From the **Administrator Settings** menu, click the **Admin Overview** link.

Administrator Settings Menu

- From the **Admin Overview** screen, click on the **Dashboard Data Sets** tile under the **Views** section.

Dashboard Data Sets Tile

- The **Dashboard Data Sets** screen, lists the following information below the **Search** field:
 - **Number of Data Sets (Data Sets):** The total number of Data Sets.
 - **Published Data Sets:** The total number of Data Sets that are published and can be used within Dashboard Builder. Published Data Sets will be out of 10. You can only have 10 Published Data Sets within the system at a time.
 - **Unpublished Data Sets:** The total number of Data Sets that are unpublished and cannot be used within Dashboard Builder until they have been published.

Total Data Set Fields

- Click the **Dashboard Date Set Name** to select a **Dashboard Data Set** from the list.

Dashboard Data Set

- From the **Edit Data Set** screen, scroll to the **Tabs** section and select the **Data Transformation** tab.

Deleting a Data Transformation

1. From the **Data Transformation** tab, click the **Delete** icon.

Delete Icon

2. A **Confirmation** pop-up will appear listing the Dashboards affected by deleting the Data Transformation. The **Confirmation** screen indicates that the Data Transformation will be deleted from the following list of Dashboards. A Dashboard Chart will break if the Data Transformation is actively used on a chart in a Dashboard (i.e. x- or y-axis, conditional formatting, etc.). No Core Object data will be affected by deleting a Data Transformation.
3. Click the **Yes** button to delete the Data Transformation from the system.
