

Adding Geolocation Data to a Dashboard Data Set

Last Modified on 09/12/2025 10:59 am EDT

Overview

Administrators can add Geolocation data to a Data Set to create a Map Chart using the Dashboard Builder.

User Account Requirements

The user account you use to log into Resolver must have Administrator permission or Data Management advanced permissions to add geolocation data to a Dashboard Data Set.

Related Information/Setup

Please refer to the [Creating a New Dashboard Data Set](#) article for more information on adding a Data Set to the system.

Please refer to the [Adding a Map to a Dashboard](#) article for more information on creating a Map Chart Dashboard.

Navigation

1. From the **Home** screen, click the **Administration** icon.

Administration Icon

2. From the **Administrator Settings** menu, click the **Admin Overview** link.

Administrator Settings Menu

- From the **Admin Overview** screen, click on the **Dashboard Data Sets** tile under the **Views** section.

Dashboard Data Sets Tile

- From the **Admin: Dashboard Data Sets** screen, click on a **Data Set**.

Data Set

Adding Geolocation Data to a Data Set

- From the **Admin: Edit Data Sets** screen, scroll to the tab section and click the **Properties**

tab.

Properties Tab

2. Click the **+ Add Property(ies)** button.

Add Property(ies) Button

3. From the **Add Properties** pop-up, enter Geolocation in the Search field to narrow down the Properties list.

Search Field

- Click on the **Geolocation** link under the desired Object Type.

Geolocation Link

- Click the **+ Add Selected** button to add the selected Geolocation Properties to the Data Set.
