

Deleting an Indoor Location Point

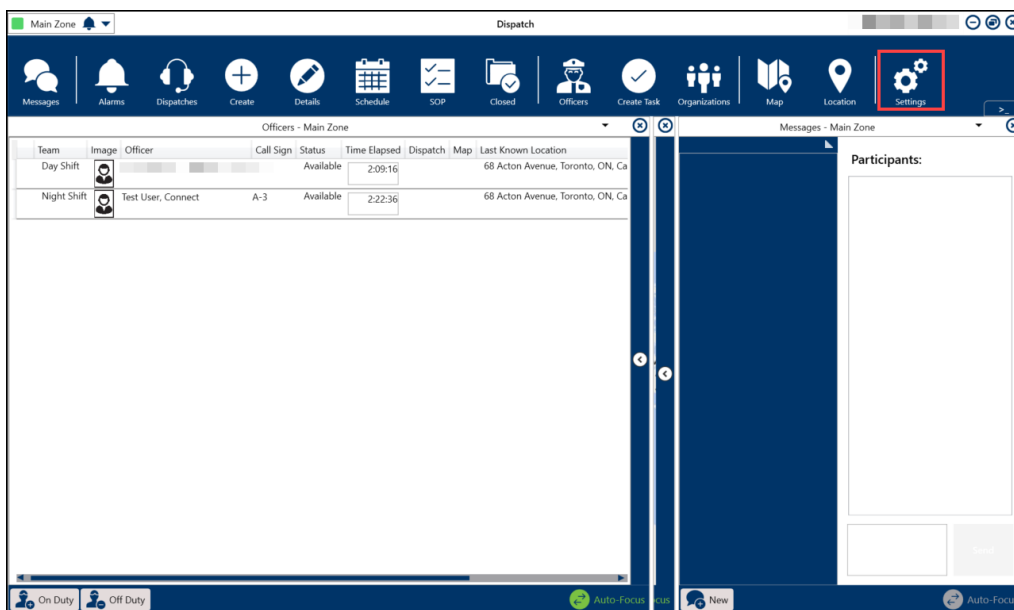

Last Modified on 09/05/2024 9:41 am EDT

Overview

A Command Center administrator can delete an indoor location point.

Navigation

1. From the **Dispatch Home** screen, click the **Settings** icon.

Settings Icon

2. From the **Settings** screen, click the **Locations** icon.

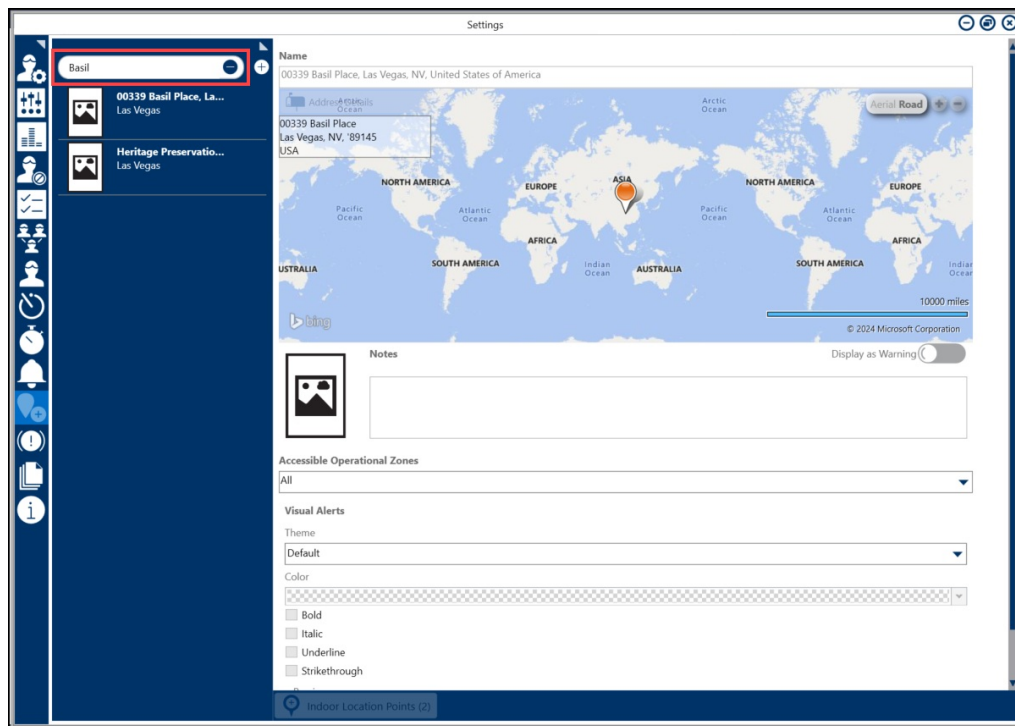

Locations Icon

3. Enter the location's name or street address in the **Search** field.

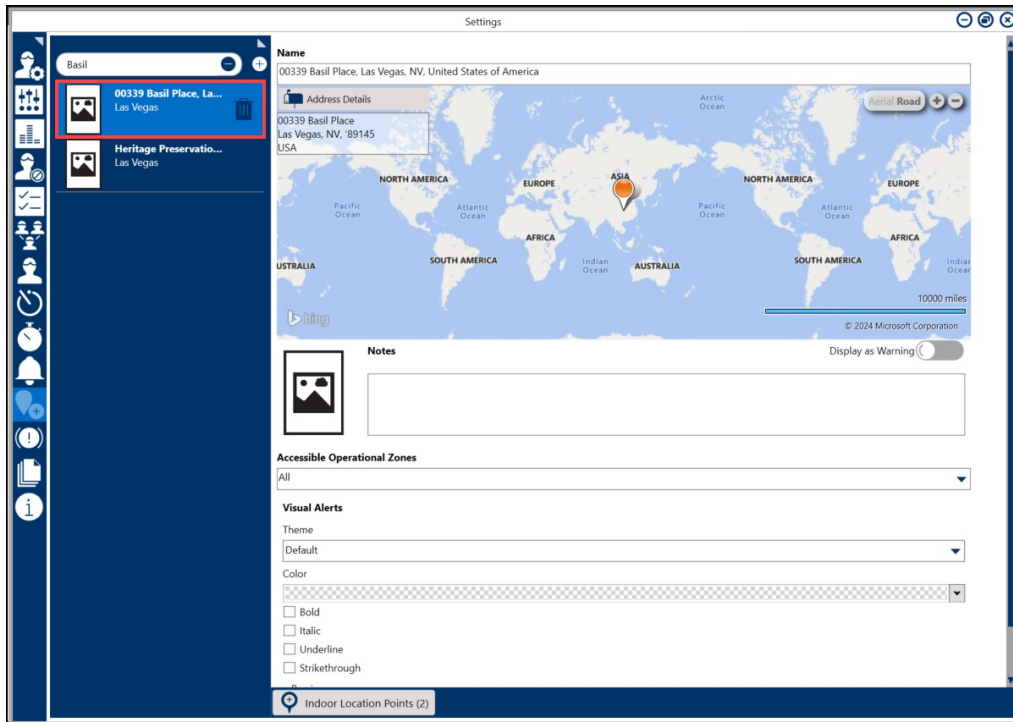

Note:

Up to 250 locations are displayed in left-hand pane in the **Locations** settings. To find a specific location, use the search function.

Search Field

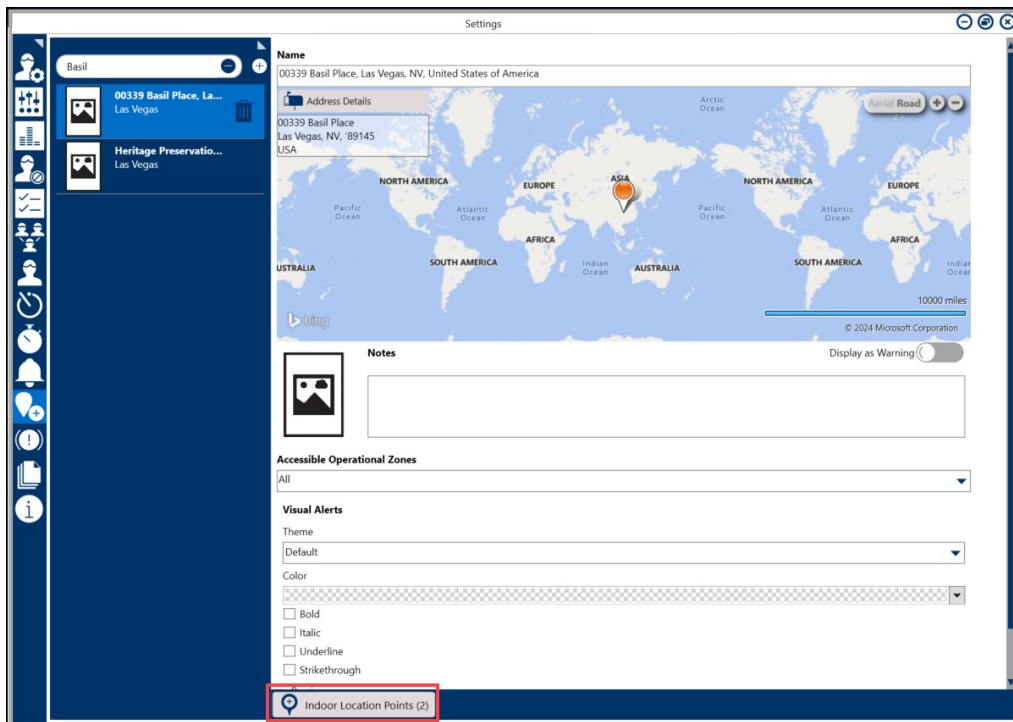

4. Click the **Location**.

Location
