

Enabling Requirement Similarity on an Org

Last Modified on 11/06/2025 3:58 pm EST

Overview

Requirement Similarity is an AI-powered feature that allows Compliance teams to identify similar regulatory obligations (requirements) both within the same framework and across different frameworks.

From the **Feature Access** screen, Administrators and Settings Management advanced permission users can self-enable **Requirement Similarity** on their Orgs.

User Account Requirements

The user must have Administrator or Settings Management advanced permissions to access the **Feature Access** screen.

Related Information/Setup

For further information on adding **Requirement Similarity** to a form, please refer to the [Adding the Requirement Similarity Feature to a Form](#) article.

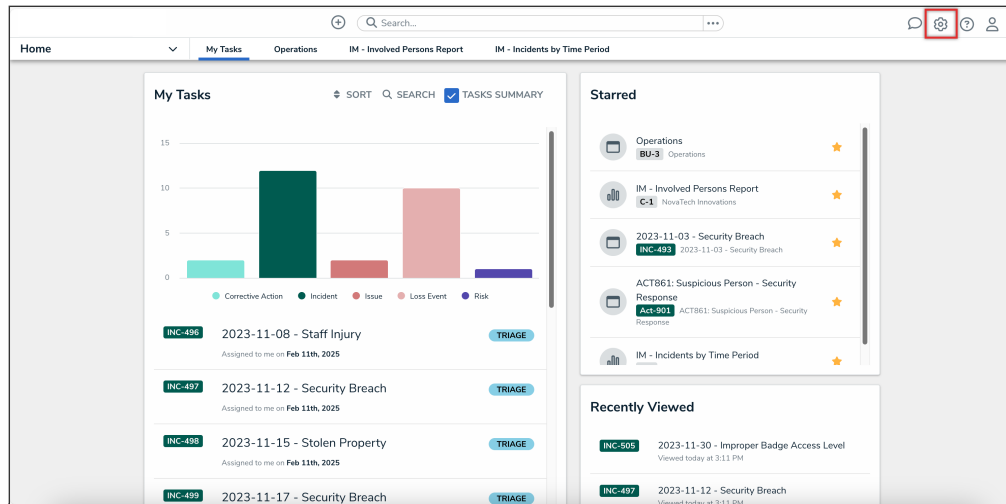

Tip:

Please refer to the [Requirement Similarity Information Sheet](#) for internal use, including sharing with your InfoSec or Legal teams if there are concerns about AI usage, and for a deeper understanding of the feature's technical details.

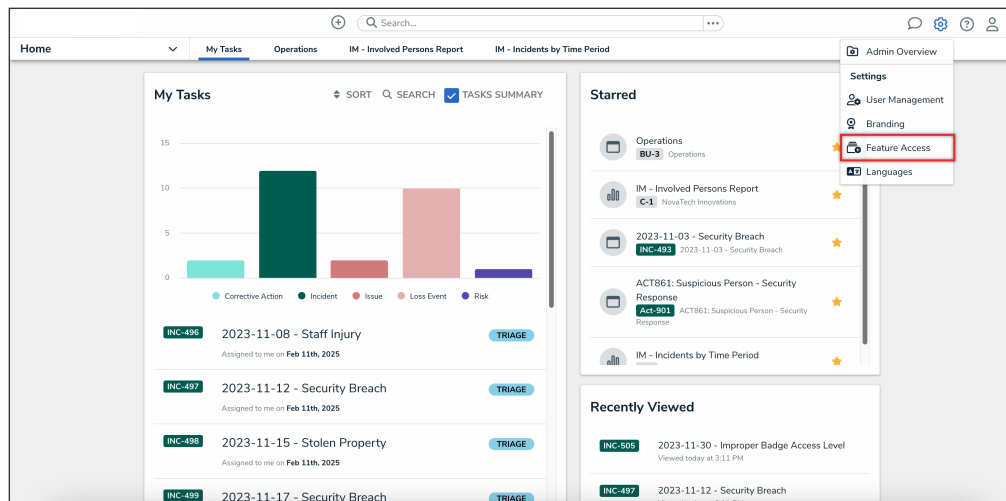

Navigation

1. From the **Home** screen, click the **Administration** icon.

Administration Icon

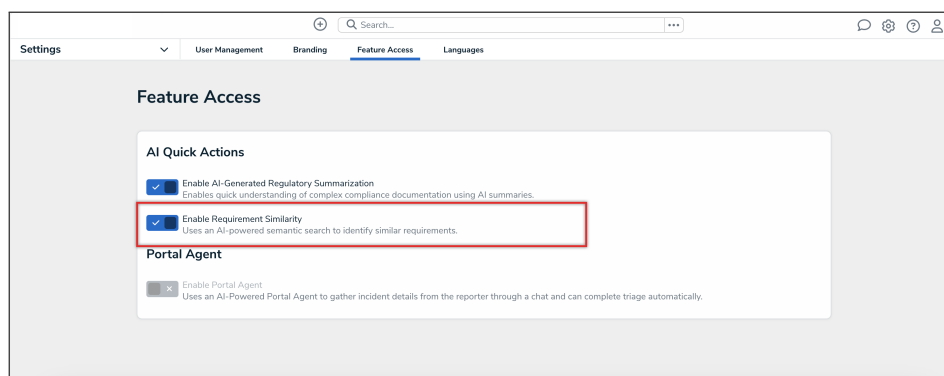

- From the **Administrator Settings** menu, click the **Feature Access** link.

Administrator Settings Menu

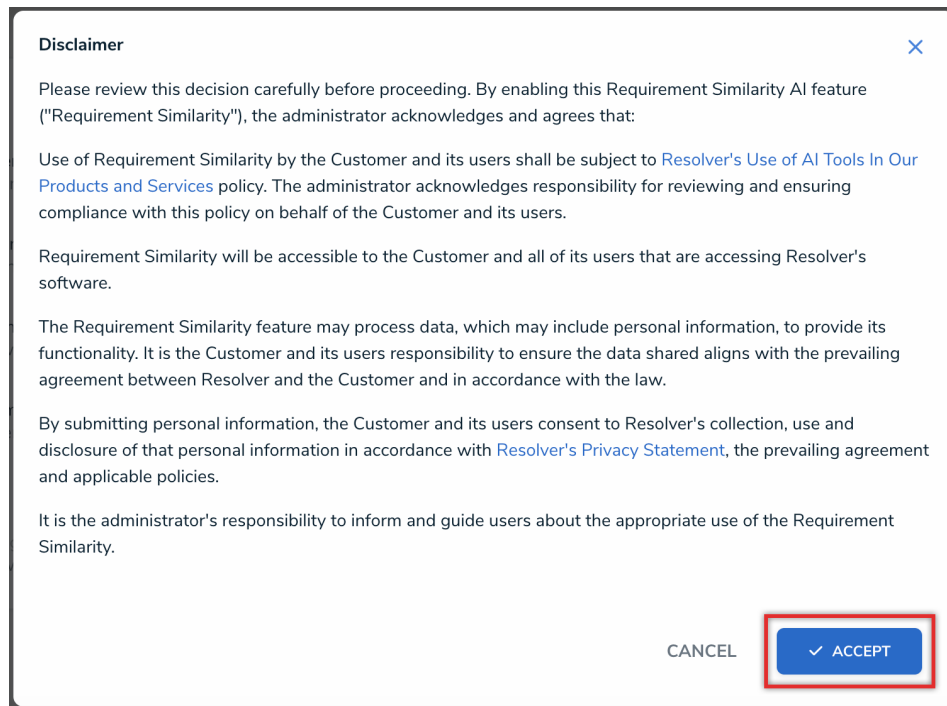

Enabling Requirement Similarity on an Org
