

Enabling AI-Recommended Controls on an Org

Last Modified on 11/07/2025 3:40 pm EST

Overview

AI-Recommended Controls is an AI-powered feature that allows Compliance and Risk teams to leverage AI to automatically recommend relevant operational controls for regulatory requirements or risks.

From the **Feature Access** screen, Administrators and Settings Management advanced permission users can self-enable **Recommended Controls** on their Orgs.

User Account Requirements

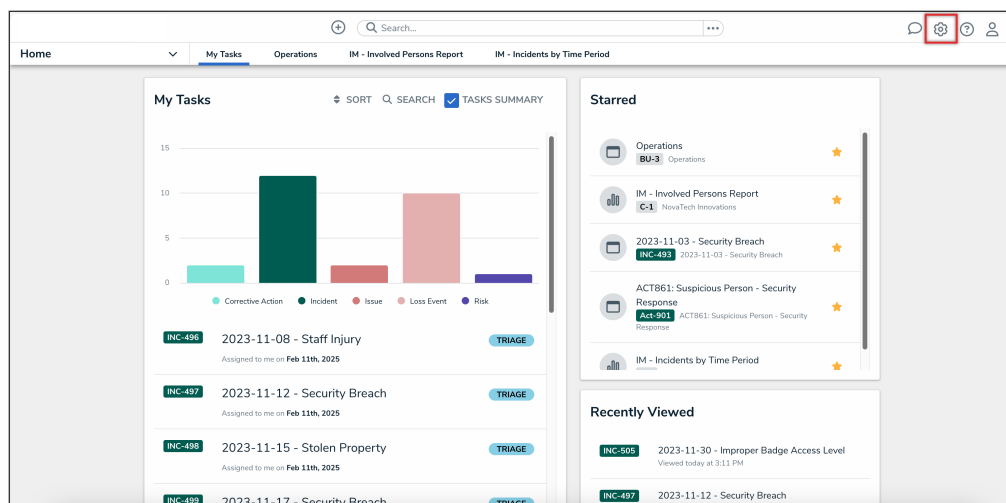

The user must have Administrator or Settings Management advanced permissions to access the **Feature Access** screen.

Related Information/Setup

For further information on adding **Recommended Controls** to a form, please refer to the [Adding AI-Recommended Controls to a Form](#) article.

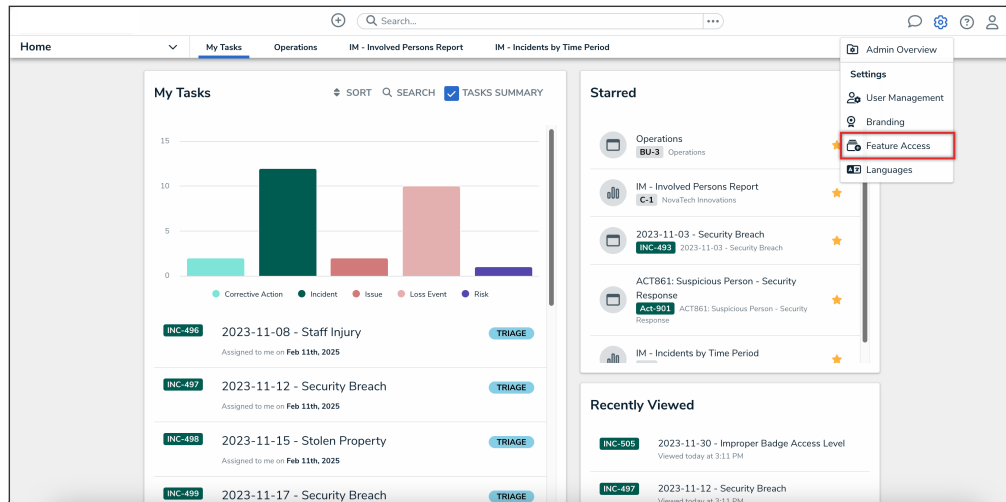

Navigation

1. From the **Home** screen, click the **Administration** icon.

Administration Icon

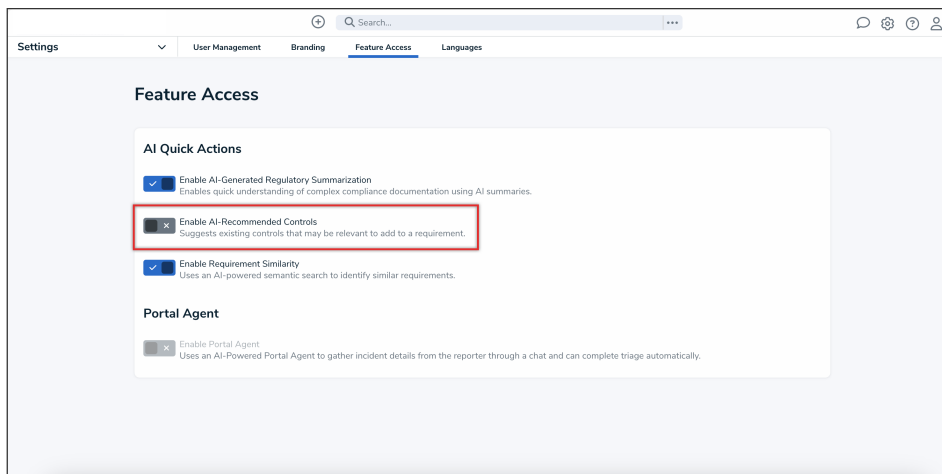

2. From the **Administrator Settings** menu, click the **Feature Access** link.

Administrator Settings Menu
